

WE ARE THE FAITHFUL MAJORITY

We are the faithful majority. The vast majority of religious Americans — 69 percent, according to a new polling analysis — support nondiscrimination protections that would protect gay, lesbian, bisexual, and transgender people in jobs, public accommodations, and housing.

FAITHFUL MAJORITY

Faith For Equality, a coalition of 120+ religious groups that support LGBTQ dignity, is excited to release this new analysis of data collected by the Public Religion Research Institute's American Values Atlas. We can't let the religious right continue to spread misinformation that LGBTQ rights and religion are in conflict. We must correct the record and ensure that the public, the media, and lawmakers understand the strong and growing support for LGBTQ rights among religious Americans.

Across the country – in red states, blue states, and purple states – there is unmistakable support for nondiscrimination protections. Not only are courageous religious leaders stepping forward to make the moral argument for LGBTQ rights, but now we have data to prove that most religious Americans are supportive of these efforts. The goal of the Faithful Majority campaign is to raise public awareness of this strong religious support for LGBTQ rights by activating our networks and faith leaders to share this data widely through op-eds, social media, legislative meetings, and other contact with Senators. We need your help to accomplish this.

Do you strongly favor, favor, oppose or strongly oppose laws that would protect gay, lesbian, bisexual, and transgender people against discrimination in jobs, public accommodations, and housing?
